PROFESSIONAL SUMMARY

Computer Engineering graduate with practical experience in IoT system integration and embedded development. Strong foundation in Linux environments, embedded C/C++, and system troubleshooting. Seeking an entry-level System Engineer role to support system operations and infrastructure environments.

TECHNICAL SKILLS

Systems & Validation:
- Linux (CLI usage, process management)
- Log analysis and system troubleshooting
- Basic system validation

IoT & Cloud:
- ESP8266 / ESP32 integration
- RFID system integration
- Firebase Realtime Database

Programming & Scripting: JavaScript (Automation), Python, SQL
Testing: Test case design, Manual and regression testing, Defect reporting
Tools: Postman, Git, Firebase, VS Code

PROJECT EXPERIENCE

Final Year Project: IoT RFID Access Control
Description

Designed and implemented an IoT-based RFID access control system integrated with Firebase. The system included a web interface and a Flutter application for user registration and access monitoring.

Responsibilities
- Designed and tested an IoT-based RFID access system
- Integrated device data with Firebase Realtime Database
- Validated data consistency between hardware and backend
- Performed functional and edge-case testing on access logic
- Debugged integration issues during system testing
- Verified system behavior under various input conditions

Technologies / Tools

- RFID Module
- Microcontroller
- C / C++ (Embedded Programming)
- Firebase (Authentication & Database)
- Flutter (Dart)
- Web-based Monitoring Dashboard

INTERNSHIP EXPERIENCE

Software Tester Intern
Callvoice Communications, Bangkok
May 2019 – August 2019

- Designed and executed test cases based on system requirements.
- Performed manual testing to identify functional and UI defects.
- Supported regression testing to verify defect fixes.
- Documented and reported bugs in collaboration with development teams.
- Collaborated with developers and senior testers to clarify requirements and validate fixes.

EDUCATION

2016 – 2022

- Bachelor of Engineering (Computer Engineering)
- Naresuan University

2013 – 2015

- Phetpittayakom School, Phetchabun
- Science–Mathematics Program

ADDITIONAL INFORMATION

Languages

- Thai: Native
- English: Intermediate (able to read technical documentation)

Availability

- Available to start within 15 days
- Willing to relocate and work in Bangkok

Soft Skills

- Analytical and structured problem-solving
- Strong attention to detail
- Troubleshooting-oriented mindset
