PROFESSIONAL SUMMARY

QA Engineer with hands-on experience designing deterministic test frameworks using Playwright and JavaScript. Strong foundation in risk-based manual testing, defect lifecycle management, and CI-ready automation architecture. Focused on building reliable, isolated test systems that reduce flakiness and strengthen validation confidence.

TECHNICAL SKILLS

Test Automation:
- Playwright (Page Object Model, Fixtures, Isolated Test Design)
- JavaScript / Node.js
- Test isolation strategy & flakiness prevention

Manual Testing & QA:
- Risk-Based Testing
- Boundary Value Analysis
- Decision Tables
- State Transition Testing
- Defect Lifecycle Management
- Requirement Traceability Matrix (RTM)

CI/CD & Tools:
- GitHub Actions (Basic)
- Git
- Postman (API Testing)
- Docker (Basic)

Programming:
- JavaScript
- Python
- SQL

PROJECT EXPERIENCE

QA Automation Project — Playwright E2E Framework

- Designed deterministic end-to-end test suites using Playwright with Page Object Model architecture
- Implemented isolated test data and clean state control to eliminate shared-state flakiness
- Structured tests for independent execution and CI-ready pipeline integration
- Improved automation stability through stable selector strategy and controlled async handling

Manual QA Project — Risk-Based Test Design

- Created RTM and prioritized scenarios based on business risk impact
- Applied boundary value analysis and decision table techniques to maximize coverage efficiency
- Designed regression and exploratory test scenarios
- Documented defects with severity assessment and performed root cause analysis

---

INTERNSHIP EXPERIENCE

Software Tester Intern
Callvoice Communications, Bangkok
May 2019 – August 2019

- Designed and executed functional and regression test cases based on system requirements
- Identified and documented defects with clear reproduction steps
- Performed exploratory testing to uncover edge-case issues
- Collaborated with developers to validate fixes and confirm defect resolution
- Contributed to structured QA test cycles

EDUCATION

Bachelor of Engineering (Computer Engineering)
Naresuan University
2016 – 2022

Science–Mathematics Program
Phetpittayakom School, Phetchabun
2013 – 2015

AVAILABILITY

- Available within 15 days
- Open to relocation and Bangkok-based opportunities

Soft Skills:

- Adaptive learner with continuous improvement mindset
- Structured and system-oriented thinking approach
- Collaborative team player with clear communication mindset
- Positive and supportive team contributor
